CAREY & HART, in placing this Catalogue before the public, would remark, that it is by no means a perfect list of their entire Stock, and that with few exceptions it contains *no American Editions.* It is composed chiefly of a large Collection of Books which they have recently imported from England, among which will be found many that are extremely rare, as well as the best editions of some of the choicest of the English Classic Authors; all of which they now offer for Cash, at the low Prices affixed.

C. & H. have always on hand, a very large assortment of Books in the various departments of Science, their catalogue of which, recently published, may, with this, be had *gratis*, on application being made, (*if by letter, postage paid.*)

Persons wishing to form or enlarge their libraries, or to purchase for public institutions, will do well to submit their lists to C. & H. or to examine their stock, which, they flatter themselves, will be found the most extensive, both in English and American literature, of any in the Union.

"The very name of Addison inspires delight; confidence, hope, comfort, love, gratitude, and adoration, are what he infuses into a Christian spirit; there is occasionally a sort of easy and natural sublimity about Addison, which belongs peculiarly to himself; but the peculiar feature in his composition, which stamps him as an undoubted original, is his Humour, wherein he is unrivalled. He who hath the Baskerville edition, hath a good and even a glorious performance. It is pleasant (and of course profitable) to turn over the pages of these lovely tomes, on a day of oppression from heat or of confinement from rain."—*Dibdin Lib'y Comp.*

"We may safely affirm, that, by giving the Inductive Philosophy to the world, Lord Bacon has proved one of its most signal benefactors; and has largely done his part towards promoting the final triumph of all truth, whether natural, or moral and intellectual, over all error; and towards bringing on that glorious crisis, destined, we doubt not, one day to arrive, when, according to the allegorical representation of that great poet, who was not only the admirer of Bacon, but, in some respects his kindred genius—TRUTH, though 'hewn like the maogled body of Osiris, into a thousand pieces, and scattered to the four winds, shall be gathered limb to limb, and moulded, with every joint and member, into an immortal feature of loveliness and perfection.' "—*Lord Brougham.*

"No books, prior to those of Lord Bacon, carried mankind so far on the road to truth; none have obtained so thorough a triumph over arrogant usurpation, without seeking to substitute another; and he may be compared with those liberators of nations who have given them laws by which they may govern themselves, and retained no homage but gratitude."—*Hallam.*

Lord Brougham remarks, that "few men, whose public life was so short, have filled a greater space in the eyes of the world during his own times than Lord Bolingbroke, or left behind them a more brilliant reputation. Not more than fifteen years elapsed between his first coming into parliament and his attainder; during not more than ten of these years was he brought before the public in the course of its proceedings; and yet, as a statesman and an orator, his name ranks among the most famous in our history, independently of the brilliant literary reputation which places him among the best classics of our Augustan age."

"John Bunyan may pass for the father of our novelits; he possessed, in a remarkable degree, the power of representation; his inventive faculty was considerable, but the other is his distinguishing feature. He saw, and makes us see, what he describes; he is circumstantial without prolixity, and in the variety and frequent change of his incidents, never loses sight of the unity of his allegorical fable. His invention was enriched, and rather his choice determined, by one rule he had laid down to himself, the adaptation of all the incidental language of scripture to his own use. There is scarce a circumstance or metaphor in the Old Testament which does not find a place bodily and literally, in the story of the Pilgrim's Progress."—*Hallam.*

"We may justly cherish the memory of Peele as the oldest genuine dramatic poet of our language. His David and Bethsabe is the earliest fountain of pathos and harmony that can be traced in our dramatic poetry. His fancy is rich and his feeling tender: and his conceptions of dramatic character have no inconsiderable mixture of solid veracity and ideal beauty. There is no such sweetness of versification and imagery to be found in our blank verse anterior to Shakspeare."—*T. Campbell, Spec. of Brit Poets.*

"The versification of Ariosto is more distinguished for grace, sweetness, and elegance, than for strength. The opening of all his cantos is adorned throughout with the richest poetry; and the language is so perfectly harmonious, that no poet, either before or after him, can be in this point compared to him. Every description is a picture, and the eye of the reader follows the pen of the poet. The Orlando of Ariosto is universally known; it has been translated into all modern tongues; and by the sole charm of its adventures, independent of its poetry, has long been the delight of the youth of all countries."—*Sismondi.*

"Jerusalem Delivered has placed its author by the side of Homer and of Virgil, and has elevated him, perhaps, above all modern poets. The scene of the Jerusalem Delivered so rich in recollections, and so brilliant from its associations with all our religious feelings, is one in which nature displays her richest treasures, and where descriptions, in their turn the most lovely and the most austere, attract the pen of the poet."—*Sismondi.*

Do. do. do. calf. 7 00

"For a century and a half Italy had been unable to boast of her literary superiority; but, in producing Metastasio, nature seemed to have made her ample amends, as none of her writers ever more completely united all the qualities that constitute a poet—vivacity of imagination and refinement of feeling, with every charm of versification and expression. Nor shall we easily find one who, by the mere force of his style, is entitled to be considered as a more graceful painter or more delightful musician."—*Sismondi.*

CYCLOPÆDIA (the) of Practical Medicine, comprising Treatises on the Nature and Treatment of Diseases, Materia Medica and Therapeutics, Medical Jurisprudence, &c., now completed, in 4 large 8vo. vols. This Original and National Work is the joint production of no less than *sixty-seven* of the most eminent Practical Physicians of Great Britain and Ireland, and is edited by John Forbes, M. D., F. R. S., Physician to the Chichester Infirmary; Alexander Tweedie, M.D., Physician to the London Fever Hospital; John Conolly, M. D., late Professor of Medicine in the London University. The distribution of the labour among so many writers, and the *authentication of all the articles by the signatures of the authors*, give to this work a character of originality and authority very different from that which belongs to Encyclopædias on the plan of anonymous publication, or to compilations by single writers, however learned and industrious.

"Such a work as this has long been wanting in this country. British Medicine ought to have set itself forth in this way much sooner. We have often wondered that the medical profession and the enterprising publishers of Great Britain did not, long ere this, enter upon such an undertaking as a CYCLOPÆDIA OF PRACTICAL MEDICINE."—*Medical Gazette.*

"This Cyclopædia contains a vast accumulation of materials which are really of great practical value. In fact, it may be consulted with advantage by students and practitioners; and as a book of reference in medical literature, it will prove a work of great interest and profit to the medical bibliographer."—*Lancet, May 16, 1835.*

CYCLOPÆDIA (the) of Anatomy and Physiology, edited by R. B. Todd, M. D., F. R. S., Fellow of the Royal College of Physicians, Professor of Physiology, and of General and Morbid Anatomy, in King's College, London. This great work consists of a Series of Dissertations under the headings of the more important subjects of Human Anatomy, General, Surgical and Morbid—of Physiology—of comparative Anatomy—and of Animal Chemistry; and towards the close of the work an article will be introduced, giving a general view of the present state of Vegetable Anatomy and Physiology. In order to unite the advantages of a Dictionary with the proposed form of the work, a very copious Index will be added, containing all the Terms employed in these Sciences. The Articles are contributed by upwards of sixty distinguished writers, eminent in science. Numerous illustrations by woodcuts and other engravings are introduced throughout the work, and it is beautifully printed on superfine paper. This work will be comprised in 3 vols. royal 8vo., 2 are already published, and may be had separately, and the 3d, now in course of publication, will be completed as speedily as possible.

"This Cyclopædia has now become almost a national work. It would be disgraceful to the profession of this country were it not patronized."—*Johnson's Med. Chir. Review.*

"Taken all in all, we believe the work is one that is not likely to be easily rivalled in this or any other country of Europe."—*Medical Gazette.*

"We cannot but regard it as one of the most important and valuable works ever produced in this country."—*British and Foreign Medical Review.*

QUAIN'S Anatomy of the Arteries, with its application to Pathology and Operative Surgery, in Lithographic Drawings the size of Nature, in 13 parts.

PLAN OF THE WORK.

1st. In the Drawings, the Arteries, are in the first place, represented according to their most frequent arrangement, without the accompanying veins and nerves.

2dly. They are shown in connection with the larger veins and nerves.

3dly. The deviations from that which has been taken as the standard condition of the arteries are illustrated in a series of sketches.

4thly. Such peculiarities of the veins, and occasionally of the nerves and muscles, as appeared likely to be of importance in surgical operations are represented on a reduced scale.

5thly. Illustrations of the state of the Arteries after the Operations for Aneurism will be given at the end of the publication.

The letterpress, besides an explanation of, and remarks on, the Drawings, will contain a Series of Tables showing, in a short space, the condition of each of the larger arteries in about 290 bodies, and some Practical Commentaries, which will consist for the most part of inferences from the facts previously set forth, and their application in the performance of the operations of Surgery.

Closely conversant with the Scriptures, and deeply imbued with their spirit, he explains the truths of religion perspicuously, and without any compromise or reservation."

"The finest English writer of his age. This poet contains great beauties, a sweet and harmonious versification, easy elocution, and a fine imagination."—*Hume.*

"The merits of Spencer are of so decided and exalted a nature as to place him, in spite of every deduction, in the same class with Homer, Dante, Shakspeare, and Milton. His versification is in general uncommonly sweet and melodious; his powers of description such, with respect to beauty, fidelity, and minute finishing, as have never since been equalled; while in strength, brilliancy, and fertility of imagination, it will be no hyperbole to assert, that he takes precedence of almost every poet, ancient or modern. The Faery Queene is a poem which, more than any other, inculcates those mild and passive virtues, that patience, resignation, and forbearance, which owe their influence to Christian principles; it is, in short, a work from the study of which no human being can rise without feeling fresh incitement to cherish and extend the charities of life."—*Drake's Shakspeare, &c.*

"The sermons of Jeremy Taylor are far indeed above any that preceded them in the English Church. An imagination essentially poetical, and sparing none of the decorations which, by critical rule, are deemed almost peculiar to verse; a warm tone of piety, sweetness, and charity; an accumulation of circumstantial accessories whenever he reasons, or persuades, or describes; an erudition pouring itself forth in quotation, till his sermons become in some places, almost a garland of flowers from all other writers, and especially from those of classical antiquity.—The devotional writings of Taylor, are by no means of less celebrity, or less value than his sermons "—*Hallam.*

RACINE. Œuvres, Completes, de Jean Racine, 1 vol. with a portrait. 3 00

Do. Theatre, 4 vols. in 2, 18mo. 1 25

The style of Racine is exquisite. Perhaps he is second only to Virgil among all the poets. But I will give the praise of this in the words of a native critic. "His style is always so happy and so natural, that it seems as if no other could have been found; and every word is placed in such a manner that we cannot fancy any other place to have suited it as well. The structure of his style is such, that nothing could be displaced, nothing added. nothing retrenched; it is one unalterable whole. Even his incorrectnesses are often but sacrifices required by good taste; nor would any thing be more difficult than to write over again a line of Racine. No one has enriched the language with a greater number of turns of phrase; no one is bold with more felicity and discretion, or figurative with more grace and propriety; no one has handled with more com-

mand an idiom often rebellious, or with more skill an instrument always difficult; no one has better understood that delicacy of style which must not be mistaken for feebleness, and is in fact that air of ease which conceals from the reader the labour of the work and the artifices of the composition, or better managed the variety of cadences, and the resources of rythm, the association and deduction of ideas.—*La Harpe.*"—*Hallam.*

Portrait and Autograph Letters.

"We are very glad to see this great writer's works put forward in a popular form, and at a price exceedingly low. A man may be very much injured by perusing maudlin sentimental tales, but cannot he hurt, though he may be shocked every now and then, by reading works of sound sterling humour, like the greater part of these, full of benevolence, practical wisdom, and generous sympathy with mankind. . . . The work is prefaced by an able biography of Fielding by Mr. Roscoe, in which he does justice to the great satirist's memory, and rescues it from the attacks which rivals, poetasters, and fine gentlemen, have made upon it."—*The Times.*

"This is the very triumph of typography. We have seen many well printed books, but this surpasses each and all that have ever fallen under our notice. It is impossible, utterly impossible, that any printing can surpass this. We are well aware that such praise may be considered hyperbolical—we know that it is *true*. The letter-press, to which we would now draw attention, is especially neat. Not merely have entirely new types been used for this purpose, but there is a variety of inks: the marginal embellishments of the pages remind us of the ancient and splendid mode in which, by the labour of the monks, sacred works were formerly illuminated. The Wood-cuts—particularly those of the initial letters at the commencement of each of the sacred Books, are clear, picturesque, and highly decorative. The variety of inks used, black and lake, or pink, has a pleasing effect to the eye."—*Liverpool Mail.*

THE WAVERLEY NOVELS COMPLETE

FOR

FIVE DOLLARS.

Now Ready, No. 1 of a New Edition

OF THE

WAVERLEY NOVELS,

WITH A FINE PORTRAIT OF THE AUTHOR.

To be completed in 25 Weekly Numbers. Each Number will contain a Complete Novel,

COMPRISING TWO VOLUMES OF THE EDINBURGH EDITION,

AND THE WHOLE WORK COMPLETE FOR

FIVE DOLLARS---Payable in Advance.

The works of an author like Scott cannot be too extensively diffused. No one can rise from a perusal of his writings without having been instructed as well as amused. The cause of religion, virtue, and morality, find an advocate on every page—vice will seek encouragement from the same source in vain. It has been well observed by an able and eloquent American critic, that "if ever writer deserved Universal Citizenship, it was Sir Walter Scott. He was the Poet of Nature, the delineator of his species in every climate, and on every soil; so that, wherever his works were known, there was he to be regarded as a native and a denizen."

It is in this spirit that the publishers of the new edition of the Waverley Novels have undertaken to present them to the American people. They have supposed that they could not render a better or more acceptable service to the great mass of readers, than by placing such a publication within their reach. The revised uniform Edinburgh edition, from which this is reprinted comprises forty-eight volumes, the cost of which is *seventy-two dollars*. The edition now in course of publication of the

WAVERLEY NOVELS,

WILL BE FURNISHED COMPLETE, WITH PORTRAIT AND TITLE PAGES FOR

FIVE DOLLARS,

and will comprise every word in the Edinburgh Edition, the price of which is, as above stated, seventy-two dollars in boards.

The work will appear in weekly numbers of about 125 pages each—each number comprising an entire Novel—printed on good paper and will be complete in 25 Numbers—making Five Large Octavo Volumes of upwards of six hundred and fifty pages each, with Portrait and Title Pages, and as the work is already stereotyped no possible delay can take place.

The publication price affixed to this work, is less, in reference to the quality of material and style of execution, than that of any other production of the press in Europe or America. The investment and expenditures connected with this undertaking, are much greater than usually attend a republication; and it will be apparent that the publishers must rely on an extensive sale for their remuneration, and that in every instance a remittance of the amount—Five Dollars—must accompany the order. They appeal with entire confidence to the American public, for a just and liberal support in their endeavors to disseminate the means of an enlightened and rational enjoyment.

The Waverley Novels, Thiers's French Revolution and The Lady's Book for One Year, $15.

OPINIONS OF THE PRESS.

The Waverley Novels. A new Edition. Rare opportunity for Subscribers in the Country.—In this age of cheap literature, we had scarcely hoped to see any thing cheaper than the host of publications of all sorts, shapes and sizes, which we have within the last year or two been called upon to notice. But here comes our enterprising neighbour, L. A. Godey, with a proposition to furnish the entire series of the Waverley Novels, with all the author's latest corrections and additions, for the low price of Five Dollars. Think of that. Five Dollars, for what a few years ago could not be had for less than fifty; and furnished in a form too, which will make them universally accessible.

Mr. Godey's intention is to publish the whole series in twenty-five numbers, neatly done up in suitable covers, so that they may be transported by mail to the most distant places.

We have now before us the first number, containing the author's advertisement, his general preface, his three appendixes, and the whole of Waverley, with all the notes, illustrations, &c.—and accompanied by a capital likeness of Sir Walter, from a steel plate; the cost of all this being to subscribers about *twenty cents!* Can any thing possibly be cheaper than this?—*Philadelphia Saturday Courier.*

All the Waverley Novels for Five Dollars.—Mr. Louis A. Godey, of this city, is about to engage in a literary enterprise which cannot but be fully successful. He intends to publish all the Waverley Novels, with a fine portrait of the author—the work to be completed in 25 weekly numbers; the whole to be furnished for five dollars only, payable in advance. We should suppose that he would readily dispose of at least 10,000 copies. The writings of Sir Walter Scott are now considered among the highest standard works of English literature; and when an elegant edition of his novels may be obtained on terms so reasonable, the patronage on the part of the reading public, cannot but prove of the most liberal character. No. 1 of this new and cheap edition is now ready, and when we see it we shall be able to speak of the style. We feel satisfied, however, that a publisher of such reputation as Mr. G. will issue nothing that is not entitled to praise.—*Inquirer & Courier.*

Scott's Waverley Novels—Revised edition, complete for Five Dollars—Israel Post, 88 Bowery. This work is to be completed in 25 weekly numbers. Each number contains a novel complete. The first number is embellished with a splendid portrait of Sir Walter Scott. It contains the novel of "Waverley." The second number gives "Guy Mannering," and the third "The Antiquary," complete. We recommend this edition most cordially to all who are unprovided with Scott's works. No family, having any taste for literature, should be without this standard work. It is the cheapest edition published, and contains the author's latest corrections and additions. The revised uniform Edinburgh edition, from which this is reprinted, comprised forty-eight volumes, and cost seventy-two dollars.—*New York Atlas.*

Jordan, 121 Washington street, has the 2d volume of the new issue of Scott's novels. It contains Guy Mannering entire, with Lockhart's notes from the London edition. The entire novels of the immortal author are to be supplied in 25 octavo volumes at $5. It is, besides, well printed, and upon good paper.—*Boston Atlas.*

Republications—Waverley Novels.—Mr. Israel Post, 88 Bowery, has politely furnished us with the first three of a series of twenty-five numbers, which will embrace the whole of the "Waverley Novels." It would be labour thrown away for us to say a word in praise of Walter Scott's writings, for there is no author living or dead, who has acquired a more just celebrity as a powerful, original, and beautiful delineator of the human character than the author of the Waverley Novels. As a descriptive writer, he has no equal. But we wish to mention as a remarkable fact, the extraordinary cheapness of these republications. They are printed in a neat style, on good paper, for the small sum of *Five Dollars*, for the whole twenty-five numbers, each embracing a separate and complete novel. The revised uniform Edinburgh edition, from which this is reprinted, comprised forty-eight volumes, and cost *seventy-two dollars.* Thus the purchaser secures the whole of the Waverley Novels, with a portrait and title-pages, for $5, being a reduction from the original cost of sixty-eight dollars!

Those who wish to secure this valuable work, would do well to call on Mr. Post, and examine for themselves.—*New York Planet.*

The best chance ever offered for procuring the Waverley Novels, for—almost nothing—We have heard it frequently made the subject of "literary lamentation," that the voluminousness of these best of all works of their class ever written and published, makes them too expensive for those men of moderate means who are among the most ardent admirers of the illustrious author. Many and many a time have we heard the plaint uttered with absolute despondency. There can be no excuse or occasion for it, hereafter. The Waverley Novels are now within the reach of all. Mr. Israel Post, 88 Bowery, has commenced their publication in weekly numbers, each number containing an entire novel, for twenty-five cents. The whole series will be compressed in twenty-five numbers, for the small sum of five dollars; every person may become possessed of a property that we, at any rate, would not part with for forty times the sum. The numbers too are finely got up, upon good paper, and printed with great care, on type superior to most of the costly editions.—*New York Courier & Enquirer.*

NEW WORKS

PUBLISHED BY

CAREY & HART, PHILADELPHIA.

THE WORKS

OF

LORD BOLINGBROKE.

COMPLETE.

With a Life, prepared expressly for this Edition.

CONTAINING

RECENT INFORMATION RELATIVE TO HIS PERSONAL AND POLITICAL CHARACTER,

SELECTED FROM THE BEST AUTHORITIES.

In Four Volumes 8vo., printed on large type and fine paper.

Lord Brougham's Remarks.

"Few men whose public life was so short, have filled a greater space in the eyes of the world during his own times, than Lord Bolingbroke, or left behind them a more brilliant reputation. Not more than fifteen years elapsed between his first coming into parliament and his attainder; during not more than ten of these years was he brought before the public in the course of its proceedings; and yet, as a statesman and an orator, his name ranks among the most famous in our history, independently of the brilliant literary reputation which places him among the best classics of our Augustan Age."

"Of all the public characters who have acted a prominent part in English history during the last two hundred years, there is probably no statesman who takes a stronger hold upon the imagination than Henry St. John, Lord Bolingbroke. To those altogether ignorant of English politics, his name is still familiar by its connexion with Englisb literature. The friend and correspondent of Pope and Swift—the writer of some of the finest essays in the English language—his name continually presents itself in the literature and literary history of Queen Anne's reign. * * * * With Bolingbroke as a writer, this age has principally to do. To the rare excellence of his style, there is abundant testimony from critics of all tastes. It is adorned and elegant, and rhetorically correct;—but this is its least merit. It is nervous and masculine, and flows onward like a river. There is a living and life-giving energy, which imparts interest to even old and uninteresting topics, and carries the reader majestically along the rushing tide of the author's thoughts. * * * * Messrs. Carey & Hart deserve the thanks of all lovers of good standard literature for their beautiful editions of Bolingbroke."—*Boston Notion.*

THE HISTORY

OF

THE ANGLO-SAXONS;

FROM THE EARLIEST PERIOD TO THE NORMAN CONQUEST.

BY SHARON TURNER.

AUTHOR OF "THE SACRED HISTORY OF THE WORLD."

In 2 vols. 8vo.

From the Preface to the Sixth Edition.

The increasing prosperity of the British nation, and the expansion of its empire by the new colonies which are issuing from it, and are forming, as they settle and enlarge, new branches of dominion to it in the distant regions of our globe, make its first rudiments and humble beginnings more interesting to us. To represent these faithfully, and to collect from the perishing or neglected memorials of former times every circumstance that could exhibit them, before it became impossible to do so from the disappearance of the ancient documents, and from the overwhelming flow of modern events, revolutions, and diversified knowledge, which have made the last fifty years so memorable, was the favourite object of the author, when in his youthful days he conceived the idea, and attempted to execute it in the following work.

That he should have lived to revise its *sixth* edition, was more than he expected; for it is now thirty-seven years since he published its first volume. This is pleasing: but it is a still greater gratification to observe, that so much of the attention of the public continues to be directed to the transactions, remains, and language of their Anglo-Saxon ancestors, and that so many able men still apply themselves to illustrate this truly national subject by various and valuable publications. It was one of his earnest wishes that men of talent and industry should be induced to do so, that what he could not but learn imperfectly on several points might be completed by subsequent research. This has been creditable to themselves, and just to our forefathers; and will now rescue our most important antiquities from future oblivion.

The Anglo-Saxons were deficient in the surprising improvement which their present descendants have attained; but unless they had acquired and exercised the valuable qualities, both mental and intellectual, which they progressively advanced to before their dynasty ceased, England would not have become that distinguished nation which, after the Norman graft on its original Saxon stock, it has since been gradually led to be.

"This splendid historical work is issued by the publishers in a typographical style befitting its importance. * * * * In a word, this work is a treasure in literature, and will most assuredly find a place in every well-selected library; as it dwells at length upon passages in the history of England, which it has been the custom of the general historian to slur over. The History of the Anglo-Saxons will form henceforth a necessary companion to the best volumes on English history."—*Brother Jonathan.*

"It is from the press of Carey & Hart, and affords another evidence, from the excellent style in which it is reprinted, that in the opinion of the publishers the American public will sustain their efforts in presenting works more valuable than the almost worthless fictions of the day. Mr. Turner begins with the history of the various nations which became possessed of Britain in the earliest ages, explains their manners and customs, religion and warfare, and shows the effect produced upon the Saxons by their intermixture with their predecessors. The government, laws, superstitions, and literature of the

Heptarchy, are fully discussed in an able manner; and the appendix contains many interesting as well as instructive notices of other matters relating to the Saxons, as for instance, the strength and beauty of their language, and comparisons between the greatest English writers respecting their use of real Saxon words. It will be found that perhaps the most English work extant is the translation of the Bible now in use, and certainly no work could furnish a stronger argument of the capabilities of our vernacular. We commend this work as a valuable addition to popular knowledge.

"This edition is an exact reprint of the London edition, and contains all the Saxon language, the type of which was cast expressly for it. The *French* edition, of which a considerable number have been imported into this country, does not contain *a single word of Saxon*."—*Boston Morning Post.*

THE MISCELLANEOUS WRITINGS

OF

T. BABINGTON MACAULAY.

A new edition, complete in three volumes.

Purchasers of the former edition in Two Volumes are informed that an additional number of the Third Volume have been printed to complete their copies.

"These charming volumes are made up of contributions of Mr. Macaulay to the 'Edinburgh Review' between the years 1825 and 1837,* with an appendix containing two beautiful specimens of his poetical powers. The subjects of the present essays are Milton, Machiavelli, Dryden, History and Historians, Hallam's Constitutional History, Southey's Colloquies on Society, Lord Byron, the Pilgrim's Progress, Johnson and Boswell, Hampden, Lord Burghley, Mirabeau and the French Revolution, the War of the Succession in Spain, Walpole's Letters to Sir Horace Mann, the Earl of Chatham and his Times, and the Life, Character, and Philosophy of Lord Bacon.

"Many of these subjects, it is obvious, have wider relations: all are treated with extraordinary sense, learning, force, wit, and eloquence.—Indeed we could not name the recent work, in which, within the same compass, is to be found an equal amount of entertainment and instruction. We remember, soon after the publication of the article upon Milton, upon reading it in a retired part of Europe, where we had no means of becoming acquainted with its authorship, to have remarked that the Edinburgh Review had obtained some new contributor, capable of sustaining, if not of increasing the fame of its palmiest days."—*North American Review for October.*

"Here are three volumes of as valuable matter as are to be found in the English language. Mr. Macaulay has long been a contributor to the best English Reviews, and his papers are remarkable for their vigor and beauty of style, their deep erudition, and their completeness."—*New World.*

"Mr. Macaulay is without doubt the most brilliant writer at present enlisted in English criticism; and his numerous contributions to the prominent periodicals of Great Britain have attained a popularity far greater than is usually vouchsafed to this class of literary productions. His style is classic, remarkably vigorous, and at times dignified."—*New Yorker.*

* The third volume contains all Mr. Macaulay's writings since that time.

HISTORY

OF THE

WAR IN THE PENINSULA,

AND IN THE SOUTH OF FRANCE,

FROM THE YEAR 1807 TO THE YEAR 1814.

BY COL. W. F. NAPIER, C. B.

CAREFULLY REPRINTED FROM THE FOURTH EDITION, AND COMPLETE IN FOUR LARGE 8VO. VOLUMES, WITH FIFTY PLATES OF "PLANS OF BATTLES," &C.

From the last number of the Edinburgh Review.

"Col. Napier has now completed his arduous undertaking of recording the history of the war which England waged in the Peninsula for six years against the gigantic power of Napoleon. The task was difficult: the theme a noble one: and we may be proud that the great deeds of our countrymen have found a worthy historian. * * * * By posterity this work (for to posterity it will assuredly descend) will be considered as the testimony of an original witness: and of a witness, by his specific knowledge as well as his personal experience, well fitted to pass a judgment on the deeds which he saw and which he describes. When we say original witness, we do not mean to assert that Col. Napier, or that any other man, actually witnessed all that is related in his work; but that he, as a soldier, was present at many of the actions which he describes; that he was at the time acquainted with much of the ground traversed by our army during the war; that while the war was going on, he was a careful and skilled observer of all the proceedings of all parties concerned in it; that since its termination he has been in direct communication with the many brave men, both English and French, who shared in and have survived the toils of those memorable campaigns; and that he has had access to the most important documents relating to them, which the commanders of both nations could supply. It is these circumstances which give to his work its peculiar character, and which make it incumbent on us to judge of it by other tests and rules than those which we apply to the labours of the ordinary historian.

"The work comes before us, both as a work of art and a testimony: it might fail in the one capacity, yet retain all its value in the other. But if it justly challenge our admiration in both characters, then will it take its rank in after times with those few but precious records of antiquity, wherein the scholar was an actor as well as historian. * * *But to this high rank we think Col. Napier's history has attained.* * * * * * Passages, too, there are, which already rest in all men's memories; to which we daily recur with unabated pleasure, and which may be quoted as among the finest which our language contains, of nervous and splendid description. * * * * * *

"That, however, which peculiarly distinguishes this history, considering it merely as a work of art, is the mode in which it describes the various military operations of the many armies which for six years overran the Peninsula. As

laymen, we cannot pretend to give an opinion upon the scientific criticism with which this work abounds; but this we feel ourselves compelled to say: Col. Napier has persuaded us, whether correctly or not we will not attempt to decide, that we now really understand the military transactions he describes. Hitherto (that is, until the appearance of this history) all narratives of warlike affairs have been to us great mysteries. We were obliged to believe with a perfect faith, for our reason was wholly passive; and we knew nothing but the results of the operations described. For example, a battle, we were told, had been fought, gained by one party, lost by another: why it was gained, why it was lost, might be manifest to the learned military reader; but to us, who have ever pursued a peaceful tenor of life, such attempts at description have always proved exceedingly perplexing. From this perplexity Col. Napier has certainly relieved us: we fancy, at least, that we now know something of the leading principles of scientific warfare, and that to understand the general merits and failures in a campaign, it is absolutely necessary to be a practical soldier. The great principles of warfare, as laid down and illustrated by him, seem to form a coherent and intelligible system; a system, too, which in all ages must have been for the most part the same, no matter how much the mere instruments of warfare may have changed. * * * * *

"After great deeds done on both sides during this long and deadly struggle; after masterly combinations, and the happy strokes of art, on the part of the various contending captains; after singular varieties of fortune—that goddess that presides over war—as seen throughout the whole continuance of the strife, a striking and instructive history is given in the work before us. Instructive, we say, and to men of all classes,—to the soldier, as illustrating the whole theory and practice of his science; to the statesman, as showing all the necessities, all the calamities, all the efficiency, whether for good or evil, of this dread instrument of the human will; and to the philosopher it is rife with examples of men, instigated by strong passions, and exhibiting, under their dominion, every various hue of virtue and vice. * * *

"No man can rise from the perusal of Col. Napier's history without perceiving that his own mind has been influenced by the generous chivalry of the historian. The reader finds therein no tendency to contemn or to hate our great rival in arms; no desire to depreciate their valour or military capacity; no bitter feeling of national animosity; for he is taught to know that, if we ourselves be worthy for courage, for daring enterprise, for patient suffering, we have ever found in the French a foe worthy as ourselves in all the virtues of a soldier,—that throughout the long war described, a rich harvest of honour was reaped by both people, while none was lost by either."

NOW FIRST ADDED

BY FREDERICK SHOBERL, ESQ.

In 3 vols. 8vo. with plates.

"M. Thiers has acquired great reputation as an historian. His 'History of the French Revolution' has become a standard work and needs no eulogy. The translation of it seems worthy of the original. It is enriched by useful notes and striking illustrations, and will prove a very valuable addition to our literature."—*Courier.*

"A translation of M. Thiers's History is a work that has long been wanted. It is unquestionably the best that has yet appeared on the subject of the French Revolution, being shrewd, dispassionate, and scrupulously accurate in its details. We are glad, therefore, to see this translation, which is very ably rendered, and has the additional advantage of being copiously illustrated with notes, and anecdotal reminiscences illustrative of the private and public characters of the early leaders of the Revolution. We are all of us intimate with the names of Mirabeau, Danton, Egalité, Robespierre, Marat, &c. but few of us know any thing about their private characters: the present work will supply this deficiency. Thus recommended, we will not permit ourselves to doubt for an instant of the success of this work."—*Sun.*

"No man was better qualified for the task of writing this history than M. Thiers, who, independent of his own personal observation, has had access to various sources of authentic information, which previous writers on the subject were unable to command. He has with singular impartiality entered into the causes which produced such memorable results, and traces the progress of the revolution itself in a most masterly manner."—*Sunday Times.*

"One of the chief features in this history is the impartiality with which it is written, a quality of itself to entitle the work to the popularity it has attained. M. Thiers's history of this eventful period will be found to abound in detail, and to present views of that tremendous event, of the actors, and their motives or their impulses, under which they acted, which can be met with no where else, and will consequently be found to contain a vast deal of information new even to those who are already well read in the history of the French Revolution."—*Scotsman.*

LORD BYRON.

LORD BYRON'S POETICAL WORKS.

SPLENDID EDITION,

In 8 vols. 12mo, beautifully printed on fine paper.

With a Portrait of the Author.

"This is the best edition of Lord Byron's works which has been published in this country. We do not wish our readers to credit the assertion without proof, and we, therefore, assign the following reasons:

"Imprimis. It is printed in eight large duodecimo volumes of nearly 500 pages, in large type, on beautiful paper, with neat and strong binding.

"Secondly. It comprises all his works in their most finished state, with the author's latest corrections.

"Thirdly. It is enriched with copious notes drawn from his memoirs, and his personal history, as otherwise disclosed, and with critical annotations of various able writers, many of which serve to trace the sources from which Lord Byron derived the materials of his compositions, and embody no small portion of the literary history of his times. We are not aware that these rich and invaluable notes are to be found in any other American edition of the works of the noble bard.

"Fourthly. The illustrative matter of this edition is evidently collated by the able, but unknown editor, in a spirit of perfect candour, without any overweening admiration of the author's genius, but with a full appreciation of his powers, and a clear understanding of his peculiar faults and foibles—in short, with a determination to do him ample justice as a poet and as a man."—*Messenger.*

"The edition reflects the highest credit upon the publishers, and is admirably suited, either for a public or a private library—we commend it cordially."—*Inquirer.*

"The style in which these eight volumes have been printed and bound, reflect credit upon the liberal publishers, who have made a liberal contribution to the public or private library."—*U. S. Gazette.*

"It is no mean praise to say, that but one man in Great Britain could have treated the subject more amply and eloquently than Mr. Howitt; need we say that man is—or was—Professor Wilson."—*Metropolitan Conservative Journal.*

"It must, as it deserves to do, become very popular."—*Literary Gazette.*

"One of the most beautiful, vigorous, fresh, and English-spirited of Mr. Howitt's productions. It is a work for all classes, rich and poor. It is written with good sense and good feeling."—*Court Journal.*

"We know not in what part of the works of Washington Irving, or even of the ever-praised Charles Lamb, to look for pictures like these. They are just such as Goldsmith would have described, had he written of such places and their associations, in prose."—*United Service Journal.*

"The work contains many pleasant papers and sketches of scenery, of mountain and moorland, dingle and bushy dell, and bosky bourne, that are equal to Copley Fielding, and only inferior to Nature herself. English farmers, too, farm-servants, life in the dales of Lancasbire and Yorkshire, scenes of wild and lonely cottage life in the Highlands, and the country pleasures and pursuits of our mechanics are all drawn and descanted on with singular happiness; in fact, every paper is good where Mr. Howitt describes what he has seen and felt."—*Athenæum.*

BURTON'S

ANATOMY OF MELANCHOLY.

THE ANATOMY OF MELANCHOLY—

What it is: with all the Kinds, Causes, Symptoms, Prognostics, and several Cures of it.

IN THREE PARTITIONS,

With their several Sections, Members, and Subsections, philosophically, medicinally, and historically opened and cut up.

TO WHICH IS PREFIXED

A SATIRICAL PREFACE.

Printed from the Sixteenth Edition, which is printed from the authorized copy of 1657, with the Author's Last Corrections, Additions, &c. &c.

Complete in 1 vol. 8vo.

"This is a book so full of variety of reading, that gentlemen who have lost their time and are put to a push for invention, may furnish themselves with matter for common or scholastic discourse and writing."—*Wood's Athenæ Oxoniensis.*

"If you never saw Burton upon Melancholy, printed 1676, I pray look into it, and read the ninth page of his preface, 'Democritus to the Reader.' There is something there which touches the point we are upon: *but I mention the author to you as the pleasantest, the most learned,* and the most full of sterling sense."—*Archbishop Herring's Letters.*

Dr. Johnson speaks of it as the only book that ever took him out of bed two hours sooner than he wished to rise.

"The Anatomy of Melancholy is a book which has been universally read and admired. This work is for the most part, what the author himself styles it, 'a cento;' but it is a very ingenious one. His quotations, which abound in every page, are pertinent."—*Granger's Bibliographical History.*

Mr. Watson, alluding to Burton, says:—"The writer's variety of learning, his quotations from scarce and curious books, his pedantry, sparkling with rude wit and shapeless elegance, miscellaneous matter, intermixture of agreeable tales and illustrations, and perhaps above all, the singularities of his feelings, clothed in an uncommon quaintness of style, have contributed to render it even to modern readers a valuable repository of amusement and information."

"Let me say a word in praise of this admirable book, which could draw Johnson from his bed two hours before he was willing to rise. The quaintness of his style, sometimes rising into strains of wonderful dignity and eloquence, the fertility of his invention, the extent of his learning, the multitude of his illustrations—all contribute to render the Anatomy of Melancholy one of the most entertaining books in the language. The independence of his character, I confess, offers an additional attraction to me."—*Coleridge.*

LIFE OF PETRARCH.

BY THOMAS CAMPBELL.

AUTHOR OF THE "PLEASURES OF HOPE."

Handsomely printed in 1 vol. 8vo.

"It may be asserted with confidence, that there are very few, even among well-informed persons, who know any thing more of Petrarch than as a poet and as the adorer of Laura. They are not aware that this poet of love for all times and all nations was also a statesman, who lived and corresponded with the greatest men of his age, and who was intrusted with important diplomatic missions; and that literature owes him infinite obligations for the pains which he took to preserve the ancient classic writers, and to encourage a taste for the study of their works. Those who would wish to make themselves acquainted with Petrarch's history and merits will learn with interest that the celebrated author of 'The Pleasures of Hope' has just completed a life of him in which, with the feelings of a genuine poet, he has done full justice to the character of this eminent man in all its bearings. The fruit of mature reflection, for it has occupied the author some years, this work discusses the history and character of its celebrated subject, poetical, literary and moral, without partiality or prejudice, and in a tone of liberality that pervades all the works of his not less celebrated biographer."

OPINIONS OF THE PRESS.

"The literary part of this publication is by good and well-known hands, and is, moreover, well worthy of them; but the superior attraction is likely to be found in the admirable illustrations. They will certainly prove the most striking feature of the work, if the subsequent numbers realize the anticipations occasioned by the present. These 'HEADS,' which are humorously said to be '*taken off*' by QUIZFIZZZ, are full of character and expression, each one representing some well-known class."—*The Examiner.*

"This is one of the cleverest periodicals extant; boasting contributions from one of the greatest wits and satirists living; while the illustrations, by 'QUIZFIZZZ,' whoever the gentleman with that very-difficult-to-be-written *alias* may be, are facetious—extremely, and clever—*very.*"—*Court Journal.*

"Of the recent periodicals, not even excepting the 'Nickleby' and the 'Pickwick,' few more deserve, or better repay, an hour's reading, than this piquant series of sketches of character. There is so much truth, and such vivid touches of nature, that it would be infinitely more creditable to the literary taste, did the people prefer it to the vulgar slang which distinguishes too many popular works. Nature may be adhered to in the portraits of any class; but these sketches prove that humour can be found without diving among the disgusting characteristics of low life."—*The Court Gazette.*

"We look back to the opinion we expressed when this writer made his debut, with increased satisfaction, from a firm conviction that he has hardly a rival in that free, manly, dashing style of sketching life, manners, and humorous incidents, to which he has devoted himself. Charles O'Malley is, to our thinking, the cleverest number of any periodical work, the production of a single pen, which has yet come before us,—Pickwicks, Nicklebys, Poor Jacks, &c. all included."—*United Service Gazette.*

"This story is a story of pure, out-and-out fun; and in its quaint, occasionally rather coarse, and invariably 'rollicking' Irish way, it is, though seen through an atmosphere something misty, *brilliant after its kind* as Beaumarchais Figaro, which, from its sparkling wit, blazing out sentence after sentence, has not been inaptly compared to a display of fire-works. * * * 'Harry Lorrequer' is the most *real* Irish character that was perhaps ever drawn."—*Frazer's Magazine for September.*

WORKS

OF THE

REV. SIDNEY SMITH.

2 vols. 8vo.

"Few persons, we imagine, will hesitate in assigning to Mr. Sidney Smith a large share of the popularity which the *Edinburgh Review* so long enjoyed, and of the support, strength, and consistence that it conferred on public opinion by its teachings. The articles which are here collected, in fact the most elaborate contributions to that Journal, are without doubt those which fixed most generally the attention of the public at the time: and, while they were most effectual in founding the reputation of the Review, they carried from the starting-post the sympathies and convictions of the reader. * * * * It is in the midst of the most mirthful and exuberant outpourings of ridicule which mark the characteristic assaults of this writer, that passages of strong feeling occur the most frequently, possessing the greater power over the reader by the very force of the contrast. The round and unvarnished distinctness with which he lays down his principles, is but a natural consequence of his earnestness of purpose. With these he never trifles, never stands halting and hesitating between the truth that is to be spoken and a desire to deprecate the wrath of the corrupt, or the self-love of the foolish. No matter how great the person offended, nor powerful the interest to be attacked, the truth comes out with no saving clause, no mitigating dependency, to mollify the feeble-minded, or mislead the unsuspecting. It would not be difficult to abstract from these volumes a code of short sentences that would embrace in the fewest and most striking words the whole field of public morality. It is, indeed, merely for the happier illustration of such truths, for the purpose of bringing them home to the convictions of the lowest and the least apprehensive of his readers that he puts on the motley: like Shakspeare's clowns, he apprehends a world of figures, and sports amid infinite variety of conceits, the better to point the moral of his tale; making his wit a stalking horse, from which to transfix unsuspecting drivellers with the arrows of his reforming philosophy. Herein consists much of the fun of his peculiar style, which would speedily become a vapid mannerism, were it not perpetually salted with vivifying and stinging verities, arising out of the midst of his quips and quiddities, taking the reader off his guard, and telling with all the more effect from the very circumstance of their being unexpected.

"Never does Mr. Smith indulge in jocosity for its own sake, or trifle with the time and patience of his reader by a fool-born jest to throw him off the scent of his argument; on the contrary, his joke always contains the very pith and marrow of his theme, and places his syllogism in the most convincing light. Mr. Smith's manner is eminently his own: his logic, when he is most extravagantly droll, is ever cogent, and in his earlier writings usually sound in its premises."—*London Athenæum.*

THE PROSE WRITINGS

OF

PROFESSOR WILSON

OF EDINBURGH.

BEAUTIFULLY PRINTED ON FINE PAPER.

EXTRACT FROM HOWITT'S "RURAL LIFE."

"And not less for that wonderful series of articles by Wilson, in Blackwood's Magazine—*in their kind as truly amazing and as truly glorious as the romances of Scott or the poetry of Wordsworth.* Far and wide and much as these papers have been admired, wherever the English language is read, I still question whether any one man has a just idea of them as a whole..... But the great attraction to literary men has long been that splendid series of ample, diffuse, yet overflowing papers, in which every thing relating to poetry and nature find a place. *They are singly, and in themselves, specimens of transcendent power; but taken altogether, as a series, are, in the sure unity of one great and correct spirit, such a treasury of criticism as is without a parallel in the annals of literature.* For, while they are of a deeply poetical mind—a mind strong in the guiding instincts of nature—they are preserved from the dryness and technicality of ordinary criticism by their very poetic temperament. They come upon you like some abounding torrent, streaming on amid the wildest and noblest scenes! amid mountains and forests and flowery meadows; and bringing to your senses, at once, all their freshness of odours, dews, and living sounds. They are the gorgeous outpourings of a wild, erratic eloquence, that in its magnificent rush, throws out the most startling, and apparently conflicting dogmas, yet all bound together by a strong bond of sound sense and incorruptible feeling. They are all poetry. It is in this manner and this spirit that the writer has—reviewed, shall I say? no, not reviewed, but proclaimed, trumpeted to the farthest regions, idealized, etherealized, and made almost more glorious than they are in their own solemn grandeur, the poems of Wordsworth, of Milton, of Shakspeare, of Spenser, of Homer, and of many another genuine bard. And it is thus he has led you over the heathy mountains, and along the fairy glens of the north, to many a secluded loch, into many a highland hut. It is thus that he loves to make you observe the noble peasant striding along in his pride of youth—in his sedate manhood—in his hoary age, more beautiful than youth; for then he is crowned with the wisdom of his simple experience of the trials and vanity of life, and of the feeling that he draws near to eternity. It is thus he bids you stand and mark the fair young maiden busied about the door of her parental hut, more graceful and happy in the engrossment of her simple duties, beneath the sun and the blue heavens, than the very daughter of the palace in the lap of her artificial enchantments. It is thus he shows you the young mother tossing the laughing infant in the open air, while the two elder children are rolling on the sunny sward or scrambling up the heathy brae. It is thus he fills you with the noblest sympathies with the purest human feelings..... These are papers that have done infinite service to the cause of poetry and nature, and therefore do I rejoice in their existence."

"We commend this production in an especial manner to the instructresses of female youth, as one which they cannot read without being elevated in the scale of female character. We cannot conceive a book more singularly well adapted to take its place as a work of mingled amusement and instruction in all female seminaries of the highest class. There is, in fact, no theme more important for the study of females than that which shows them what woman has been, and is, and may be; none more calculated to lift them to that level with their would-be 'master,' which this work alone proves them so capable of attaining."—*Evening paper.*

TEN THOUSAND A-YEAR.

BY THE AUTHOR OF

"DIARY OF A LATE PHYSICIAN."

One vol. 8vo.

"We have more than once alluded to this remarkable story since the commencement of its publication in Blackwood's Magazine, as one of the most interesting and powerfully written fictions in the English language. It is by Samuel Warren, LL.D. author of 'Passages from the Diary of a late Physician,' and portions of it equal the best scenes in those celebrated sketches. The object of the writer is, apparently, to exhibit in the strongest possible light, the inherent superiority of the aristocrat to the plebeian; and for this purpose he translates his hero, Tittlebat Titmouse, from behind the counter of Dowlas, Tagrag & Co., shopkeepers in London, into the proprietorship of an estate, yielding 'ten thousand a-year,' where he enacts such extravagances as might be expected from an ignorant and base-born *millionaire.* Contrasted with Tittlebat Titmouse, is Mr. Aubrey, a man of honour, education, and refinement, who, in yielding to his successful adversary all his property, and the influence thereto pertaining, preserves his high character, and remains the 'perfect pattern of a true gentleman.' The characters are admirably drawn, and well supported, though some of them are doubtless caricatures of the classes they are said to represent."—*New Yorker.*

It is superfluous to speak of the talent or reputation of the author of 'Valentine Vox.' We have only therefore to remark that George St. George Julian promises not merely to sustain, but greatly to add to his well-earned literary fame."—*British Miscellany.*

Her Poems placed her in the first rank of her contemporaries, and her Novels have fully sustained this enviable reputation. The publishers have done her full justice in this elegant edition of her works, which adds one more volume to their series of complete works of popular authors, making fifteen volumes in all; and comprehending the works of Bulwer, Marryat, D'Israeli, Lady Blessington, and Sir Walter Scott;—the last in ten volumes, royal octavo, to correspond with the others. A TREATISE

ON THE

MANAGEMENT OF INFANCY.

BY ANDREW COMBE, M. D.

AUTHOR OF "A TREATISE ON PHYSIOLOGY."

WITH NOTES AND ADDITIONS BY JOHN BELL, M. D.

"This work ought to be in the hands not only of every physician, but should also find a conspicuous place in every family library, and its pages be carefully studied by every one who is or who anticipates to be a parent. Were the precepts and principles it inculcates to be fully carried out by every mother, in the management of her offspring, not merely would their health and comfort be more effectually insured, during infancy, but even in after life they would escape the many infirmities, sufferings, and diseases, the seeds of which are sown in the nursery, when the system there pursued is, as too generally happens, one in direct opposition to the physiological laws of the infantile organism."—*American Medical Journal.*

SECOND EDITION, ENLARGED AND IMPROVED.

BY ROBERT BUIST,

NURSERYMAN AND FLORIST.

In 1 vol. 8vo.

"This differs from most of the American works on gardening, in being an original composition from beginning to end. It is most judiciously adapted to the country in which it is published; and the author, R. Buist, of Philadelphia, is one of the best cultivators in the United States. There is no American work that we know of, at all to be compared with it in point of usefulness."—*Loudon's Gardener's Magazine.*

AMERICAN COOKERY.

Directions for Cooking, in all its Branches.

FOURTH EDITION, MUCH ENLARGED AND IMPROVED.

BY MISS LESLIE,

AUTHOR OF "SEVENTY-FIVE RECEIPTS."

"This is the most complete manual of cookery which has yet been published. It contains a large number of receipts, many of them original, in all the branches of the culinary art, set forth with a simplicity and plainness that must prevent all difficulty or misunderstanding. All the processes of preparing meats, vegetables, and pastry; all the mysteries of cakes and confectionary; all the secrets of the dishes which have a thousand times delighted our palate and puzzled our brain, are here laid open to every one who chooses to pry into them; and every housewife who is furnished with this key may provide her table with a variety of delicacies which heretofore have been thought inaccessible, but through the skill of professed cooks."—*Sat. News.*

"This volume contains the art of cooking, preparing, and carving the whole list of eatables from the egg to the apple. The book is a perfect *Vade Mecum* for the housekeeper, and we should think would be in demand for the soundness of its culinary doctrine, and the simplicity of its precepts."—*U. S. Gazette.*

"Miss Leslie has presented an excellent work to American housewives. Nothing has been incorporated but what will, by the generality of tastes, be considered good of its kind. The various matters are also arranged under distinct heads, forming a ready manual to turn to on all occasions."—*Saturday News.*

"Every parent should insist on his daughter being able to quote page and line from Miss Leslie's book. The literature and science of cookery open a new path to fame that can never be broken up or destroyed. We repeat that it should be a mother's duty to make it a daughter's study."—*Saturday Morning News.*

THE HOUSE BOOK:

OR

MANUAL OF DOMESTIC ECONOMY.

BY MISS LESLIE.

"As the writer of this has no interest in the volume above referred to, he trusts that what he is about to say will be understood as designed for the benefit of the community, and not of any individual. He thinks Miss Leslie's new work entitled 'The House Book,' one of the very best books for those who think it worth while to study economy in taking care of their furniture, clothing, and fuel, and order, neatness, and taste, in the management of their house, that has ever been published. He is quite sure that no one who pays a dollar for the book can fail to find in it the means of saving ten, or perhaps a hundred; and he especially recommends it to young housekeepers, who stand more than others in need of such instruction, as a fit companion for a previous work of Miss Leslie upon Domestic Economy."—*National Gazette.*

"It were a work of supererogation to praise a book of Miss Leslie's writing. Whatever she attempts, she is sure to execute in the best manner. Her Cookery Book has approved itself so well to the housekeepers, that it has actually run through, if we remember rightly, about a dozen editions, and the 'Seventy-five Receipts,' about twice that number. The volume before us is remarkable for its completeness and the exact practical directions which it gives. Old housekeepers will find a thousand directions set down in it, which they knew very well before, with many others which will be new. But the young wife, who is just beginning the duties of a household, will prize the volume above all price; because it contains the very things so familiar to the experienced housewife, because so useful and necessary—things, in fact, which because they are so simple and obvious, nobody ever thought of putting in a book before. Now, this is the feature which gives the book its chief value. This it is which will render it so indispensable at the opening of every new establishment in the housekeeping way."—*Messenger.*

JACK ASHORE.

BY THE AUTHOR OF "RATLIN THE REEFER," "OUTWARD BOUND," &c.

In 2 vols. 12mo.

"One of the author's best novels."—*Athenæum.*

"An exceedingly clever book of the highest Marryat class."—*John Bull.*

"'Jack Ashore' is an excellent novel, well calculated to become a standard work, from its exquisite representation of a seaman's character. It contains an infinite variety of scenes of every description—some pathetic, some awful, others very satirical, and others fraught with every species of humour, from the most broad to the most refined."—*Dispatch.*

ENCYCLOPÆDIA OF RURAL SPORTS;

OR A

Complete Account, Historical, Practical, and Descriptive,

OF

HUNTING, SHOOTING, FISHING, RACING,

AND OTHER

FIELD SPORTS AND ATHLETIC AMUSEMENTS

OF THE PRESENT DAY.

BY DELABERE P. BLAINE, ESQ.

AUTHOR OF "OUTLINES OF THE VETERINARY ART," "CANINE PATHOLOGY," &c. &c.

One very thick volume, 8vo.

ILLUSTRATED BY

NEARLY SIX HUNDRED ENGRAVINGS ON WOOD BY R. BRANSTON,

FROM DRAWINGS BY ALKEN, T. LANDSEER, DICKES, ETC.

Handsomely bound in fancy cloth, lettered.

"The book is a perfect library for all lovers of country sports, for all country gentlemen, and for all persons who delight in the manly and healthy recreations which are afforded to the inhabitants of no country in such perfection as to the inhabitants of the British Isles. It is true the book treats of the field sports, and the sports by flood, of all the countries in the world, and is, for that reason, so much the more valuable; but its principal value with Englishmen will be, the great accuracy with which it describes the sports of which they can partake in their fields, woods, and waters, and the plain and agreeable manner in which intelligence on subjects with which they want to be acquainted is conveyed. The book is a large one, and so filled—indeed, so crammed—with information, that it becomes a matter of conjecture as to how the whole can have been brought together. It is what it professes to be, 'an encyclopædia of the amusements of the country.' The book is illustrated by an immensity of engravings on wood, by Mr. R. Branston, from drawings by Alken, T. Landseer, Dickes, and other artists. It is at once a manual and a library for all sportsmen."—*Times.*

ALSO, BY MR. M'CULLOCH,

A Dictionary,

PRACTICAL, THEORETICAL, AND HISTORICAL, OF

COMMERCE AND COMMERCIAL NAVIGATION.

A new Edition has lately been published, with a new and enlarged Supplement, bringing down the information contained in the work to 1841.

In this Edition all the more important returns and accounts as to the TRADE, NAVIGATION, and CONSUMPTION of this and other countries, have been brought down to the latest period. In some instances, too, the form of the returns has been changed, and new ones, drawn up on a more comprehensive plan, and embracing various additional particulars, have been substituted for those previously embodied in the work. In illustration of this the reader is referred to the tables now given under the articles IMPORTS and EXPORTS: they will, it is believed, be found to contain, within a brief space, the completest view hitherto laid before the public of the recent trade of the British Empire. A few new articles have also been inserted; among which may be specified those on Bombay, Malta, &c.

FIELDING, SMOLLETT, SWIFT.

CHEAP LONDON EDITIONS.

SWIFT'S WORKS

Complete, with a Memoir by THOMAS ROSCOE, Esq., and a fine Portrait of the Dean, engraved by Freeman. 2 vols. medium 8vo. cloth, gilt.

"No author in the British language has enjoyed the extensive popularity of the celebrated Dean of St. Patrick's. The vivid and original power of his genius has supported him in the general opinion to an extent only equalled by his friend Pope, and far surpassing any other of those geniuses who flourished in the Augustan Age of Queen Anne."—*Sir Walter Scott's Preface.*

FIELDING'S WORKS

Complete, with Life by ROSCOE, Portrait, and Autograph Letter. Medium 8vo. cloth, gilt.

"We are very glad to see this great writer's works put forward in a popular form, and at a price exceedingly low. A man may be very much injured by perusing maudling sentimental tales, but cannot be hurt, though he may be shocked every now and then, by reading works of sound sterling humour, like the greater part of these, full of benevolence, practical wisdom, and generous sympathy with mankind. The work is prefaced by an able biography of Fielding by Mr. Roscoe, in which he does justice to the great satirist's memory, and rescues it from the attacks which rivals, poetasters, and fine gentlemen, have made upon it."—*The Times.*

SMOLLETT'S MISCELLANEOUS WORKS

Complete, with Life by ROSCOE, Portrait, &c. Medium 8vo. cloth, gilt.

"Smollett and Fielding were so eminently successful as novelists, that no other English author of that class has a right to be mentioned in the same breath. We readily grant to Smollett an equal rank with his great rival Fielding, while we place both far above any of their successors in the same line of fictitious composition. Perhaps no books ever written excited such peals of inextinguishable laughter as those of Smollett."—*Sir Walter Scott's Biographical Notices.*

The main object of this work is to improve the dwellings of the great mass of society in the temperate regions of both hemispheres; a secondary object is, to produce a work at once scientific and popular, upon a subject which has been hitherto treated in a manner calculated rather to repel than to invite the general reader; and a third object is, to render domestic architecture and furniture a study fit for ladies.
